## PROFESSIONAL SUMMARY

Full Stack Software Developer with over 2.5 years of experience building and maintaining scalable, production-grade applications using ASP.NET Core, C#, and Microsoft SQL Server, along with modern front-end frameworks such as React, Redux, TypeScript, and Material UI. Proven experience in developing business-critical systems involving target management, pricing workflows, and sales-driven logic. Strong in debugging and resolving production issues, implementing business-driven enhancements, and collaborating with cross-functional teams to deliver reliable, maintainable, and performant software. Brings mentoring experience from a prior role as a Teaching Assistant at NXT Wave.

## WORK EXPERIENCE

### Software Developer

Nov 2023 - Ongoing

Talent Pace - Bangalore, India

- Played a key role in designing and developing a production-grade Distributor Management System using ASP.NET MVC, powering a large-scale, business-critical platform for Himalaya Wellness Company, a leading FMCG enterprise.
- Designed and implemented a hierarchical target assignment and achievement tracking module, enabling top-down target distribution with real-time visibility into target allocation and performance, directly supporting sales and incentive management.
- Developed and enhanced the pricing integration module by consuming SAP pricing data and implementing complex business logic to ensure distributors receive accurate and compliant prices based on division, team, distribution channel, and state.
- Actively worked on business-driven Change Requests, implementing enhancements to better align the system with business processes and optimize sales operations.
- Handled live production issues by performing root-cause analysis across application and database layers and delivering permanent fixes with minimal impact on operations.
- Collaborated closely with business users, QA, and SAP integration teams to gather requirements, validate business rules, and ensure smooth rollout of features.
- Participated in production support and stabilization by proactively identifying recurring issues and implementing long-term solutions to improve system reliability, performance, and business impact.
- Built and developed a production-grade Resource Management System using React, Redux, TypeScript, MUI, and ASP.NET Core Web APIs, used by HR teams to manage employee directories, RBAC, onboarding, domain-wise resource mapping, and dynamic search & filtering.
- Designed and deployed scalable REST APIs, integrated them with frontend state management, and deployed the application to production on Smarter ASP.NET, ensuring reliable and stable usage.

### Teaching Assistant

Sep 2023 – Nov 2023

NXT Wave – Hyderabad, India

- Assisted fellow CCBPIans in their learning journey through academic and technical support.
- My role involves clarifying the doubts of students after their learning sessions, coding practices, and assignments. In the area of Front-end technologies like HTML, CSS, Flexbox, and Bootstrap.

## EDUCATION

Bachelor of Science in Electronics and Communication Engineering  
Jawaharlal Nehru Technological University - Anantapur, India

June 2019 - May 2023  
CGPA – 9.13

## PROJECTS

### Distributor Management System - Full Stack Development

- Developed and supported a PAN-India, production-grade Distributor Management System for Himalaya Wellness Company, using ASP.NET MVC, C#, and Microsoft SQL Server, supporting large-scale FMCG sales operations across multiple states and distribution channels.
- Designed and implemented a hierarchical target assignment and achievement tracking module, forming the core system for nationwide sales performance monitoring and incentive calculation.
- Built a SAP-integrated pricing module by consuming SAP pricing data and applying complex business rules to ensure accurate and compliant pricing based on division, team, distribution channel, and state.
- Handled business-driven change requests and high-impact production issues through root-cause analysis across application and database layers, collaborating with business, QA, and SAP teams to deliver reliable and scalable solutions.

### Resource Management System– Full Stack Development

- Built and currently maintain a production-grade Resource Management System using ASP.NET Core Web APIs and React (Redux, TypeScript, Material UI), actively used within the company by HR to manage employee directories, role-based access control (RBAC), onboarding, domain-wise resource mapping, and dynamic search and filtering.
- Designed and deployed scalable REST APIs, integrated them with frontend state management, and released the application to production on Smarter ASP.NET, ensuring reliable, stable, and secure usage
- Implemented secure authentication and authorization using JWT-based authentication, enforcing role-based access control across application modules and ensuring protected user access.
- Leveraged Redux for efficient state management and designed an intuitive, user-friendly interface, improving application performance, usability, and overall user experience.

### Shopping Cart – FrontEnd Development

[View in GitHub](#)

- Developed a comprehensive Online Shopping Cart using React, Redux, TypeScript, HTML, CSS, Bootstrap, and JS, incorporating features such as cart management, wish list, and robust sorting functionalities.
- Integrated a seamless cart management system, enabling users to effortlessly add, remove, and manage items in their shopping cart for a smooth shopping experience.
- Implemented a dynamic sorting mechanism, allowing users to organize products based on various criteria such as price, popularity, and relevance.
- Designed and implemented a wish list feature, allowing users to save desired items for future reference or purchase.

### CERTIFICATIONS

---

- “Agile Methodology Virtual Experience Program” in October 2022 organized by **Cognizant-USA**.
- “Basic Data Science 101” course organized by **IBM Skills Build**.
- Got Elite certification from **NPTEL** on a Twelve-week course in “Cloud Computing” during (Jan-Apr 2024)
- Two weeks of an online course on “TCS ION Career Edge – Young Professional” during the period 1st - 15th June 2021 organized by **TCS ION**.

### ACADEMIC RESEARCH PAPERS

---

- Created an IoT pollution monitor to detect hazardous gases, providing real-time data and promoting air quality awareness. [View Paper](#)
- Smart Shopping System using Radio Frequency Identification Technology. [View Paper](#)

### KEY ACCOMPLISHMENTS / CONTRIBUTION TO COLLEGE

---

- Stood first in the “ACADEMIC YEAR 2020-21” in my 2nd B.Tech.
- During the academic year 2022-2023, I had the opportunity to serve as the Association President of my department and conducted several technical and non-technical events, fests, and guest lectures.
